

Data-Act-Information

Regulation (EU) 2023/2854

Product information

Product: E-Ink Cases with NFC Display for iPhone 17 series, Qi2 ready

Article numbers: 541787, 541788, 541789

Product type: Smartphone case with NFC function and E-Ink display

Manufacturer: 4smarts GmbH

Data used or processed during use

During an image update, the product uses or processes the following data:

- Image or display data selected by the user
- NFC communication data
- Technical device and display identification data

The selected image is provided by the user and is not generated by the case. Data are transmitted only when the user actively updates the display.

Access to the data

The user controls the image selection and transfer through the compatible smartphone and the application used to update the display via NFC.

Data processing

The case processes the transferred display data locally via NFC. The last display state remains visible until it is replaced by a new image. The case itself has no independent internet or cloud connection.

Access by the manufacturer

The case does not transmit selected images, NFC transfer data, account data or other user-related data to 4smarts GmbH.

Purpose of data processing

The data are processed only to transfer the image selected by the user and update the E-Ink display.

The case performs no processing beyond this function.

Legal basis

This information is provided for documentation purposes in connection with Regulation (EU) 2023/2854 (Data Act).
